## INSECT PEST SURVEY

Bureau of Entomology, U.S.D.A.  
and  
State Entomological Agencies, cooperating.

-----  
Special Report No. 174, c. 19

March 9, 1922.

### SEED CORN MAGGOT ATTACKING POTATOES (Hylemyia cilicrura Rond.)

Under date of March 7, Mr. R. W. Leiby, Assistant Entomologist of the North Carolina Department of Agriculture, sends the following communication.

"The potato seed maggot is being complained of rather frequently as destroying the seed of early Irish potatoes in the eastern part of North Carolina. This is apparently a recurrence of the outbreak that we experienced last year."

Last year the earliest record of this pest came in from North Carolina on April 1.
